## EDUCATION

### Kean University

Union, NJ

Bachelor of Computer Science, Minor in Mathematics, Cybersecurity, Management | GPA 3.8

Dec 2026

**Relevant Coursework:** Discrete Structures, Computer Organization and Architecture, Data Structures and Algorithms, Object Oriented Analysis and Design, Computer Operating Systems, Computer Security, Ethical Hacking, Big Data Computing, Database Management Systems, Python Programming for Business, Program World Wide Web Server

## RELEVANT EXPERIENCE

### Software Engineering Intern

Augusta, GA (Remote)

CAE in Cybersecurity Community

Jan 2025 – Present

- Accomplishing the integration of LLM Ollama into an existing UI, as measured by seamless user interactions and model functionality, by leading a team of 5 and coordinating development efforts.
- Enhancing model performance and UI responsiveness by experimenting with and fine-tuning LLM models, ensuring improved accuracy and user engagement.
- Managing project timelines and team tasks, ensuring alignment with goals and delivering progress on the LLM integration, by implementing Agile methodologies and weekly sprints

### Technical Specialist

Union, NJ

Kean University IT Department

Oct 2023 - Present

- Diagnose and resolve over 100 hardware and software issues for professors and campus personnel, ensuring minimal downtime by providing timely technical support.
- Deliver exceptional customer service to a diverse user base, resolving technical issues with a 95% satisfaction rate by maintaining a patient and approachable demeanor.
- Manage and maintain computer labs across campus, ensuring systems are fully operational, software is up-to-date, and labs are prepared for student testing and classroom needs.

## RELEVANT PROJECTS

### Alumni Employment Data Collection Using LinkedIn

Union, NJ

(Python, Scrapy, Selenium, Pandas)

Summer 2024

- Developed an automated system to collect and track alumni employment data using LinkedIn. Scraped and analyzed over 100+ alumni profiles, resulting in a 95% accuracy rate in tracking career trajectories.
- The data supported enhanced networking, career services, and institutional analysis, contributing to a comprehensive alumni employment database.

### Deep Q-Network Implementation for Lunar Lander Simulation

(Python, TensorFlow/Keras, OpenAI Gym, NumPy, Matplotlib)

- Successfully implemented and optimized a Deep Q-Network (DQN) model for the Lunar Lander simulation, achieving over 90% success in safe landings.
- Improved fuel efficiency and demonstrated effective learning progression, with the model showing strong convergence and increasing rewards over time.

## HONORS, CERTIFICATIONS, & EXTRACURRICULAR

**Research Programs:** Freshman Research Initiative - Feb 2023 | Research First Initiative (Machine Learning) - Jan 2024, Scholars Academy - Summer 2024, McNair - Summer 2024, CAHSI LREU – Spring 2025

**Conference(s):** Grace Hopper Conference – 2024, Secure World Conference – 2024, AESNJ Conference – 2025, ISC2 Chapter Conference – 2024

**Organization(s):** ACM - Association for computer Machinery (Member), AI4ALL (Scholar) - October 2023, Kean association of marketing (Member), Women in Cybersecurity (WiCys), Girls who Code, Muslim Student Association (Member)

**Awards:** Carl L. Toney 'Joy of Discovery' Research Internship Award - 2024, Research Days 2024 Award, Dean's List – 2022, 2023, 2024, National Science Foundation (NSF) Scholarship

## CORE QUALIFICATIONS

**Technical Skills:** Python, Java, Linux, R, Git, GitHub, NLP, Windows, Eclipse, Vs Code, Neural Networks, Generative AI, Data Analysis, Troubleshooting, Kali Linux, Network

**Non-Technical Skills:** English, Pashto, Urdu, Hindi, Communication, Teamwork, Problem-Solving, Customer Service, Project management, Leadership
